

CPAC Inc. Selected for Network Infrastructure Upgrade Project by Huntington Beach Union High School District

CPAC Inc., the foremost provider of IT solutions and services, was recently selected by the Huntington Beach Union High School District (HBUHSD) to complete a district-wide network infrastructure refresh and upgrade.

The project was a result of a close collaboration between CPAC, Brocade Networks and the District. Together they designed an efficient, cost-effective and state-of-the art network for HBUHSD to replace the existing network that was both outdated and no longer supported by the manufacturer. Special discounted educational pricing was created to provide a new district-wide network for all nine HBUHSD high school campuses.

To minimize the downtime of the District's network, all the hardware for each campus is being staged and preconfigured at CPAC's Anaheim facility. This network upgrade project positions HBUHSD to better meet and exceed the current standards set for Common Core which is a set of clear college-and career-ready standards for K-12 grade students as well as other future educational challenges that will require a powerful and efficient network.

"I am very impressed by the level of detail and the amount of effort CPAC dedicated into this project," said Patrick Gittisriboongul, Ed. D, Director of Educational Technology and Information Systems. "I appreciate the commitment, support and partnership CPAC continues to extend to HBUHSD in dealing with the complexity and challenges this project entails."
